Eval. Notes:

Inspection Date: March 8, 2013 Facility: Phoenix Down Corporation Location: 85 Route 46 West, Totowa Borough Passaic County EPA ID#: NJD980781249 Representative: Ray Navgle, Warehouse Manager - 973-812-8100 (phone) 973-812-9077 (fax) John Facatselis, Owner (Not present - out of country) The purpose of the inspection was to perform a CESQG inspection at Phoenix Down Corp. Phoenix Down is a manufacturer of down, feather and polyester bedding, including mattresses, pillows, and comforters. Upon speaking with R. Navgle, Phoenix has not generated hazardous waste for over 10 years or more. The old feather washing unit has been disconnected and no longer in use. The only wastes streams generated are cardboard, which are reused for packaging product or recycled by placing unwanted cardboard in a compactor for recycling. We toured the facility. There are two areas of manufacturing in the building, one is for polyester filling of bedding and the other is for filling soft down feathers for bedding. After the bedding is stuffed with either fill material, it is sewn and packaged. Linen materials are used in the bedding and pillows. Phoenix obtains all its down & feathers from a China-based supplier. The feathers used are pre-washed and prepared for use prior. The rest of the building is used for warehousing product and raw materials used to make the bedding. At the time of inspection, there were no other areas where wastes are generated. Universal Wastes, such as fluorescent bulbs were not stored anywhere in the building. R. Navgle was provided a RCRA Compliance Assistance Package for future guidance in proper disposal of these types of waste streams. Recommendation: I recommend this EPA Id number be deactivated. A deactivation form was faxed to Phoenix Down Corp for their submission to deactivate their number on March 12, 2013. M.P.K.
